Code of Conduct

This Code of Conduct defines the expectations for team behavior, communication, and responsibilities. All team members agree to follow these rules to ensure a productive and respectful working environment.

Team Roles	-Scrum Master (Susan): Facilitates meetings and ensures scrum principles are followed. -Product Owner (Vatsal): Oversees task tracking, documentation, and progress on the Git Hub.	
Team Meetings	- Team meetings will occur [3-4 times per week]. - Meetings should last no longer than 15 minutes for stand-ups. - Attendance is mandatory; if absent, notify the team in advance.	
Accountability & Consequences Policy	Performance Expectations	- Attend all lectures and lab sessions related to the project - Attend scheduled Scrum meetings - Complete assigned tasks before the agreed deadline - Update GitHub progress regularly - Communicate blockers at least 24 hours before a deadline

		Failure to meet the mentioned expectations will result in consequences outlined below:	
	Consequences	Level 1: First Offense (Warning Stage)	Trigger: - - Missing 1 deadline without valid reason - Missing 1 meeting without prior notice - Failing to update GitHub task progress Action: - - Verbal warning during team meeting - Issue recorded in team log - Task must be completed within 48 hours
		Level 2: Second Offense (Formal Warning Stage)	Trigger: - - Repeated missed deadline - Repeated absence - Lack of contribution to sprint work Action: - - Written warning documented in GitHub project board

			- Reallocation of critical tasks to another member - Offending member assigned additional supporting tasks - Reduced decision-making influence in sprint planning
		Level 3: Serious Non-Performance	Trigger: - - Missing 2+ deadlines in one sprint - Skipping lectures/labs repeatedly - Zero meaningful contribution in a sprint Action: - - Formal complaint to teaching staff - Contribution report submitted as evidence - Possible removal from key project components - Individual performance review submitted separately
	<u>To ensure fairness:</u>		

Contribution Tracking system	- All work must be pushed to GitHub with identifiable commits - Each sprint must show visible contribution from every member - Task board must reflect real-time updates - Pull requests must include description of work done <u>If a member has:</u> - No commits - No documentation contribution - No meeting participation Then they will be flagged in the sprint review.
Deadline Policy	- Deadlines are non-negotiable unless approved by majority vote - Emergency extensions require proof and team agreement - Silent delays are unacceptable
Lecture & Lab Attendance Rule	- 2 unexcused absences = automatic Level 2 warning - 3 unexcused absences = escalation to teaching staff - Attendance is considered part of contribution.
Professionalism Clause	<u>If any team member:</u> - Shows disrespect - Avoids communication intentionally - Block's progress of others The team may vote (majority rule) to escalate immediately to Level 3.
Final Clause (Contribution Transparency)	<u>At the end of the project:</u> - A contribution summary will be prepared - Peer evaluation will reflect actual effort - No member will receive equal credit for unequal work - Fair contribution = fair recognition.

Lab Attendance	- All members should attend lab sessions together. - Lab time is part of teamwork and progress tracking.			
Agreement	By signing below, each team member agrees to follow this Code of Conduct and contribute to the success of the project.			
	Name	Role	Signature	Date
	Susan Rayamajhi	Scrum Master, Frontend Developer 1, Documentation		28/02/2026
	Abhishek Parikh	Frontend Developer 2, Database Supporter		28/02/2026
	Vatsal Tailor	Product owner, Database designer, Backend Supporter		28/02/2026
	Saurab Pandey	Backend Developer 1, Deployment Side		28/02/2026
Vidhi Rami	Backend Developer 2, Frontend Supporter		28/02/2026
